## EXPERIENCE

**General Assembly**, New York, NY

**March 2015 – June 2015**

Web Development Immersive | Web Developer

**Coach** – *A web application that gives tennis coaches a tool to analyze their student's swings using video captured through their mobile device. The videos are then stored and displayed to the student with coaching comments.*

- Implemented a hybrid multi page web application using Ruby on Rails, Sqlite3, Javascript/JQuery, and Bootstrap.
- Consumed an external API to take and store HTML5/Flash videos.
- Displayed camera, video, and navigation dynamically with AJAX and JQuery.

**Zombie Diner** – *A single-page web application built to the specifications of a diner owner, using Sqlite3, Express.js, Backbone.js, and Semantic UI*

- Displayed the diner's menu dynamically using Backbone.js.
- Applied form validation and a responsive design using Semantic UI.
- Maintained a Representational State Transfer (REST) architecture.

**FeedMe** – *A news feed that gathers news stories from three APIs. It is a single-page web application built with Ruby/Ruby On Rails and Javascript/JQuery*

- Achieved user accounts and sessions using Bcrypt
- Populated the news feed using Twitter, Google News, and New York Times API
- Gained experience collaborating and working in a development team.
- Applied pair programming techniques.
- Managed code repository via Github.
